

ABOVE GROUND PRECAST CONCRETE HOME PROTECTION STORM SHELTER

Freestanding Shelter with No Anchoring Required

Shelter shown is 7' x 7' x 8'-8" tall with standard gray concrete exterior finish. This particular size is recommended for up to 12 people. Many sizes are available. Call 1-800-824-8351.

This Shelter May qualify for Federal Grants based on the Tornado Shelters Act (Public Law 108-146)

Your Storm Safe Is Manufactured With The Following Protection Features

- High strength concrete shelter weighs over 12 tons
- Storm Safe design for wind speeds up to 250 mph, which are greater than that of an F-5 tornado.
- Bolt-on, galvanized steel door frame with 36" wide steel powder-coated door.
- Hockey puck style, heavy duty padlock to restrict access while not in use.
- Door lifter escape bar. If the door is blocked by obstructions after a storm event, the escape bar allows occupants to exit.
- Precast concrete construction with low electrical conductivity & noise resonance.

Why A Storm Safe From Advance Concrete Products Is Your Best Choice

- Advance Concrete Products has been building quality, heavy-duty, precast concrete structures since 1966.
- An independent, third party engineer evaluated our shelter designs for conformance to the NSSA Standard.
- We deliver to your prepared site.
- Our trailer-mounted cranes are capable of unloading your 12+ ton shelter.
- Advance Concrete friendly crane operators are highly experienced to help your installation go smoothly.
- Your Storm Safe shelter can be set up & ready to use at your site a few hours after arrival.
- Your new shelter can be transported & re-installed if you move to a new home.
